

Displaying a PDF on Screen Photo Galleries vs iframes

Last Revised 2/11/20

NEW

Option 2: iframe the document

PRO:

- Clear text; no degradation or fuzziness.
- Displays actual PDF, making it undeniably ADA compliant.
- Can be used in a News Component!

EXAMPLES:

- [Miramonte Bell Schedule >>](#)
- [Weldon Bell Schedule >>](#)

CON:

- Have to get comfortable with a little bit of code.

Guidelines for your iFrame

- You still need to upload the PDF & RTF files.
 - This maintains Tier 1 ADA compliance
 - This create a link for your iframe

What is an iframe?

- An iframe is an html code element that allows you to display or embed an external webpage onto a webpage.

Gate

Gifted And Talented Education
2019/2020

Did you know?
Students qualify for GATE designation based on the previous years SBAC scores. The criteria for qualification is:

- a student who scores in the 95th percentile in **BOTH** Math and Language Arts
- OR
- a student who scores in the 99th percentile in **EITHER** Math or Language Arts.

In 2019 twenty-one Clark students qualified for GATE designation. Of those students, six were students coming from elementary school and are now in 7th grade. **FIFTEEN** of those students were Clark students last year and are now in 8th grade. Way to go Chieftains!

Stay on your webpage.
Add a **Text Window** to your page.

- To add this new component, repeat:
 - Edit Page (at top of browser)
 - New Component
 - Text Window = Type

Edit the text window and click the <> arrows at the bottom of the text window.

Manage Text Window

Component Title

☐ Show Public Title as a bar Save Component Title

Edit Text Window Content

Page will auto save at 3:20:56 PM

9

Copy this code and pasted in the text window:

```
<iframe width="100%" height="500"  
src="https://chs.cusd.com/Downloads/Bell%20Schedule  
%2019-20%20normal4.pdf" allowfullscreen></iframe>
```

Click on the tab you opened earlier of the PDF
and **copy the URL.** (ctrl c)

Click back to the tab where you've been editing the "code" in your text window.

Highlight the <https://chs.cusd.com/Downloads/Bell%20Schedule%2019-20%20normal4.pdf> link of the code snippet in and paste your new URL (the short key for paste is **ctrl v**).

Using the short key will replace whatever is highlighted with whatever is copied.

```
<iframe width="100%" height="500" src="https://clark.cusd.com/Downloads/GATEInformation.pdf" allowfullscreen>
</iframe>
```

Click **Save**. Now you have an iframe of the pdf from your page.

To adjust the height or width of the iframe, you can change the numbers of the code: **width="100%" height="500"**

Will look like this:

Option 1: PDF Saved as JPEG

PRO:

- What we've already been practicing.

EXAMPLES:

- [Alta Sierra Bell Schedule page >>](#)
- [Fugman Bell Schedule >>](#)

CON:

- Degrades the quality of words when converted to a JPEG.

Guidelines for your Image

- You still need to upload the PDF & RTF files.
 - This maintains Tier 1 ADA compliance
 - Since an image flattens text, a screen reader can no longer recognize the words.

*

You may have PDFs on your page, but what if you also want to show a picture of the PDF flyer directly on the page too? Too make the image of that PDF show up on your page, you will need to convert your PDF to a jpg. That way you will have TWO files: 1 is a PDF, the other a jpg.

Follow these steps to convert your PDF to a .jpg image!

1

Open your PDF. It should open in Adobe Acrobat Reader

2

Click File in the upper left corner.

3

In the dropdown, click Export To > Image > JPG

4

Choose where you want your file to save. **You should now have TWO files: 1 PDF format, 1 JPG format.**

*

In order to stay ADA compliant:

A picture (jpg) with information and text on it (like a flyer, etc) MUST still be uploaded to your page as a PDF AND RTF. Adding the jpg version allows the information to be present on the website page to be the information accessible right away, but You CANNOT only have a picture of the file. You must ALSO have a PDF and RTF of the file.
